Forecast for Sunday 28 Apr 2024

Weather: Outbreaks of rain overnight in the east, becoming more intermittent through the morning and then clearing eastwards late morning. Dry and brighter conditions follow with sunny spells developing and the odd shower. Dry and clear through the evening with cloud thickening from the west by midnight.

Chance of cloud-free hill tops above 600m: 20% overnight, becoming 90% by mid-day.

Low cloud and visibility: Extensive cloud above 400-500m at first in the east, becoming more broken above 700m during the morning and lifting clear of the summits through the afternoon. Poor or very poor visibility first thing at higher levels but becoming very good with excellent air clarity across the whole of the National Park by early afternoon.

Meteorologist's View

Feeling cold for late April, especially during the morning. Adequate layers required as well as sun protection with moderate UV levels by the afternoon.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
14:00 on Fri 26 Apr 2024	0.2mm	0.4mm	0.4mm

Forecast for Monday 29 Apr 2024

Weather: Heavy showers moving in from the west overnight and through the morning, these turning heavy at times with the risk of hail. Perhaps a brief drier interlude before further showery rain arrives from the west into the afternoon, mostly affecting western hills, again heavy at times with a strong wind. Milder but offset by rain and winds.

Maximum wind: Southerly 25-30 mph gusting 35-40 mph

Chance of cloud-free hill tops above 600m: 40%

Low cloud and visibility: Low cloud down to 400-500 m at times throughout the morning, generally rising above summits into the afternoon though some still shrouding the highest routes. Poor visibility underneath cloud and rain, rising to good by the afternoon.

Temperature: **Valleys:** Plus 7 rising to Plus 13 Celsius.
At 600m: Plus 3 rising to plus 7 Celsius.
Freezing level: Above summits.
